I haven't been able to fix my Macbook Pro (2009, 13') for almost two weeks now, and I'm starting to get desperate.. What did work was using a bootable usb In a friend's Mac, download the desired OS installer (High Sierra in my case for my MacBook Pro Late 2011 - google 'How to Download a Full macOS High Sierra Installer App') and create the bootable USB, HDD or even SSD with Disk Creator (2 steps very friendly freeware.. Apple released the new Mac OS X 10 10 Yosemite in the Mac App Store for everyone to download and install for free on October 16th, 2014, but downloading a 5+ GB file for each of your computers will take some serious time.. After knowing the reasons why your MacBook keeps crashing, you take corresponding solutions to fix it.. The best thing to do is download it once and create a bootable install USB drive from the file for all of your Macs.
